# Contract Tracing & Tracking Application

Release Items – September 11, 2020

[www.nasa.gov](http://www.nasa.gov)

Office of the Chief Information Officer

## Training Environment

- CTT Training Environment is available for use
  - <https://nasahealth--training.lightning.force.com/>
  - All users should have an account in this environment
  - The new features detailed in this presentation will not be available in the training environment until Tuesday, September 1, 2020

## Presumptive Inquiries

- If a "Presumptive Inquiry" refuses to be tested for Covid-19 do I need to perform contact tracing?
  - This is left to the discretion of the Center to determine if contact tracing should be performed on a "Presumptive Inquiry"
  - If a center checks the "presumptive" box for someone who is presumed positive, but (a) refuses to be tested and (b) the Center wants to perform contact tracing for the individual then the Contact Tracer should uncheck the "presumptive" box and treat individual as a "Positive Inquiry" in order to view and work the "Contact Outreach" queries in the queue
- All "Presumptive Inquiries" that have a negative test recorded in the system should be closed

## Release Enhancement Overview – 09/11/20

- A new "Return to Work" status option has been created
- Reports have been renamed to remove "Case" from title and replace with "Inquiry"
- The drop-down list for test results have been updated to include only the following
